

## BUIP114: Drop Support for the BSV HF Config Parameters in BUCash

Submitted by: Griffith

Date: 2019/3/27

Revised 2019/4/14

### **Summary**

The purpose of this BUIP is to determine if BU is to continue to release clients supporting BSV HF of BCH

### **Proposal**

BSV HF should no longer be supported by BU in future releases in the BCH client.

In the event that this BUIP passes, I will be charged with the task of making a PR that will remove BSV specific features from the BUCash client on Github.

Before my PR removing BSV specific features is merged, a new branch should named *BSV* should be made to preserve the current release with the BSV features. The new *BSV* branch will be a snapshot of the current *dev* branch unless it is deemed unstable by The Developer in which case the snapshot will be of the current *release* branch.
